ABOUT

I am a dedicated React developer with one year of experience in the job market. During this time, I have honed my skills in various aspects of web development, including Rest APIs, Figma to HTML, CSS, JavaScript to React. Additionally, I have experience in creating admin panels and developing a versatile editor using Fabric.js. My diverse skill set and strong work ethic make me a valuable asset for Web development projects and your Company.

EXPERIENCE

StudioWebTechs   12/2022 - 06/2023
MERN Intern
Key Responsibilities and Achievements:

- Worked alongside a team of experienced developers to learn the ropes of MERN (MongoDB, Express.js, React, Node.js) stack development, gaining hands-on experience in building web applications.

- Collaborated on various projects, contributing to the development of web applications and web services while adhering to best practices and industry standards.

- Participated in coding, testing, and debugging, honing my skills in problem-solving and troubleshooting issues that arose during development.

- Demonstrated a strong commitment to learning and adapting to the fast-paced and dynamic environment of StudioWebTechs, laying a strong foundation for my future career growth in the software development field.

My internship at StudioWebTechs served as an excellent launchpad for my career in software development, allowing me to build a strong MERN Stack foundation, learn industry best practices, understand the inner workings of the job market, and solidify my interest in frontend development with a focus on React. This experience has been instrumental in shaping my path in the software development industry.

Nexiosphere   06/2023 - Present
React Developer
Key Responsibilities and Achievements:

- Developed and maintained admin panels for clients, ensuring efficient and user-friendly interfaces to manage and control various aspects of their applications.

- Acquired proficiency in Scss, a CSS pre-processor, which I applied to enhance the styling and visual appeal of web applications, resulting in improved user experiences.

- Specialized in Fabric.js, an HTML5 canvas library, and played a crucial role in the development of the "TajPrint" project. I was responsible for creating the core functionality of a versatile editor, similar to canva.com, offering users a platform to design and customize their graphics and visuals.

- Demonstrated strong problem-solving skills, adapting to new technologies and tools, and effectively addressing project challenges to achieve high-quality results.

Nexiosphere provided me with a platform to expand my skillset and excel in various areas of web development. My experience with the company allowed me to contribute to innovative projects, particularly in the development of an editor for the TajPrint project, which enriched my abilities as a software developer.
